(54) Title: OPERATIONS ASSOCIATED WITH NTN CELL INFORMATION

FIG. 2

(57) Abstract: Various aspects of the present disclosure relate to operations associated with NTN cell information. In an aspect, a UE receives, from a network entity in a terrestrial network (TN) cell, a configuration comprising information associated with a non-terrestrial network (NTN) cell. The UE performs an operation associated with the information based on the configuration. In this way, a scheme for handling NTN cell information provided in a TN cell may be designed. By handling NTN cell information provided in a TN cell, the communication latency may be decreased and the service continuity may be improved when the UE performs a mobility from a TN cell to a NTN cell.
