(54) **Title:** PROVIDING A WWW ACCESS TO A WEB PAGE

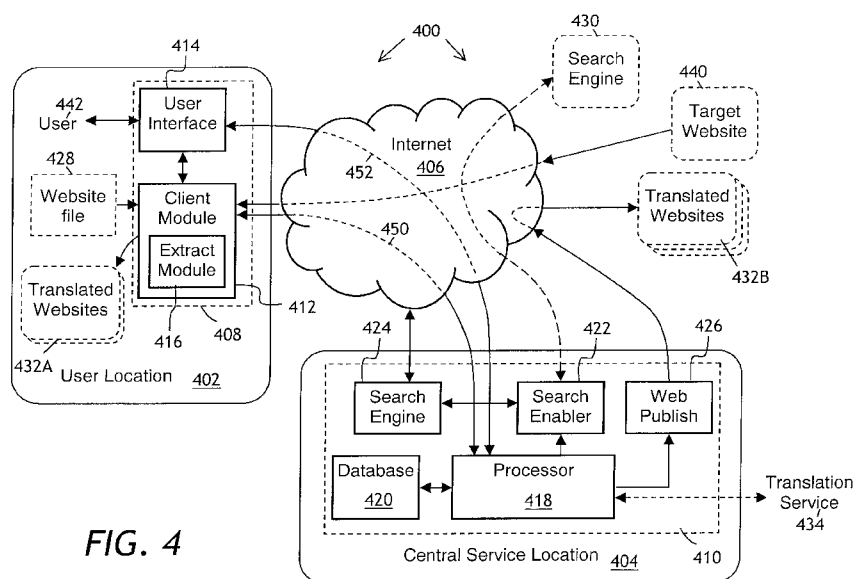

FIG. 4

(57) **Abstract:** A method and a system for providing an Internet access to a web page or a website are disclosed. The files defining the websites are accessed and indexed locally, which allows a publisher or a user of the web site to control the keywords by which the web page or a website can be found on the Internet. The user makes the web page or the website searchable by inputting the index into a search engine available to Internet users. The search engine is adapted to process queries of index input.
