(54) Title: DISPENSING DEVICE FOR CONSUMPTION OF A FLUID WITH AN OUTWARDLY MOVABLE STRAW

(57) Abstract: The invention relates to a dispensing de-
vice (1) for a fluid with a valve which is placed on the
dispensing device and has an outlet opening, and com-
prises a tube (4C) connected to the outlet opening of the
valve, wherein the tube is at least partly flexible, the tube
normally extends wholly within the casing of the cap (2),
and before use the tube can be moved at least partly out-
side the casing of the cap. Such a dispensing device is
hereby obtained with which a greater part of the content
can be administered to the user. A more aesthetic appear-
ance is furthermore obtained; the user is only connected
to the relevant dispensing device by a tube, which gives
the appearance of drinking from a glass with a straw.
