- (54) Title: ADAPTABLE BAIT STATION

- (57) Abstract: This disclosure describes devices, systems, and methods associated with pest (e.g., rodent) management. An example of monitoring device for a pest-management station includes a base station having a plurality of sensors configured to couple to a pest station and a secondary station removably coupled to the base station and having a camera configured to capture image data. The monitoring device further includes a transceiver configured to wirelessly transmit data, a memory, and a processor coupled to the memory, the processor configured to activate the camera based on sensor data from one or more sensors of the plurality of sensors. Bait stations, servers, and corresponding methods are also described.
