(54) Title: MULTI-ZONE, SINGLE TRIP WELL COMPLETION SYSTEM AND METHODS OF USE

(57) Abstract: An improved well completion system (100) for completing two or more separate production zones in a well bore during a single downhole trip is disclosed. The improved completion system comprises a completion assembly comprising two or more production zone assemblies (108) and a completion tool assembly. Each production zone assembly (106) may comprise an automatic system locating assembly and at least two inverted seal systems for sealing against the tool assembly.
