(54) Title: DRINKING CUP

(57) Abstract: A drinking cup (10) comprising a container (11) and a detachable closure (12). The closure (12) having a connection end (25) for connection to the container (11) and the connection end (25) being open for receipt of liquid from within the container (11). The closure (12) having a closed end (13) opposite the connection end (25) and a drinking rim (17) formed at the peripheral edge of the closed end (13). The closure (12) having a side wall (14) extending between the connection end (25) and the closed end (13), and at least one opening (37) that facilitates the passage of liquid from within the container (11) to the drinking rim (17). A seal (15) supported by the closure (12) and extending around an outside surface of the side wall (14) and sealing the drinking rim (17) against the passage of liquid through the drinking rim (17). The seal (15) being flexible and being responsive to pressure to lift away from the drinking rim (17) to allow the passage of liquid through the drinking rim (17) for drinking from the cup (10).
