

SACRIFICIAL ANODE ASSEMBLY AND METHOD FOR INSTALLING SACRIFICIAL ANODE

ABSTRACT

Disclosed is a sacrificial anode assembly capable of preinstalling a sacrificial anode to the bottom of a ship or the like without being limited by a painting operation. The sacrificial anode assembly may include: a sacrificial anode body having an installation reference surface for installation toward a bottom of a structure; a core having an insertion portion and a pair of laterally-bent portions that extends from the insertion portion so as to be exposed outside both sides of the sacrificial anode body or so as not to be exposed outside both sides thereof and is bent forwards or backwards in the same lateral direction, and made of a conductor; and a pair of supports configured to be connected to the pair of laterally-bent portions so as to support the laterally-bent portions.
