

Device for transferring a fluid from a supply tank to a receiver tank**ABSTRACT**

Device (0) for transferring a fluid from a supply tank (10) to a receiver tank (20), the transfer device comprising at least one duct (3) for charging the receiver tank (20) with liquid and at least one duct (4) for return of the gas, the gas return duct (4) making it possible to transfer the gas contained in the receiver tank (20) at a pressure close to or significantly different from the pressure of the supply tank (10).
