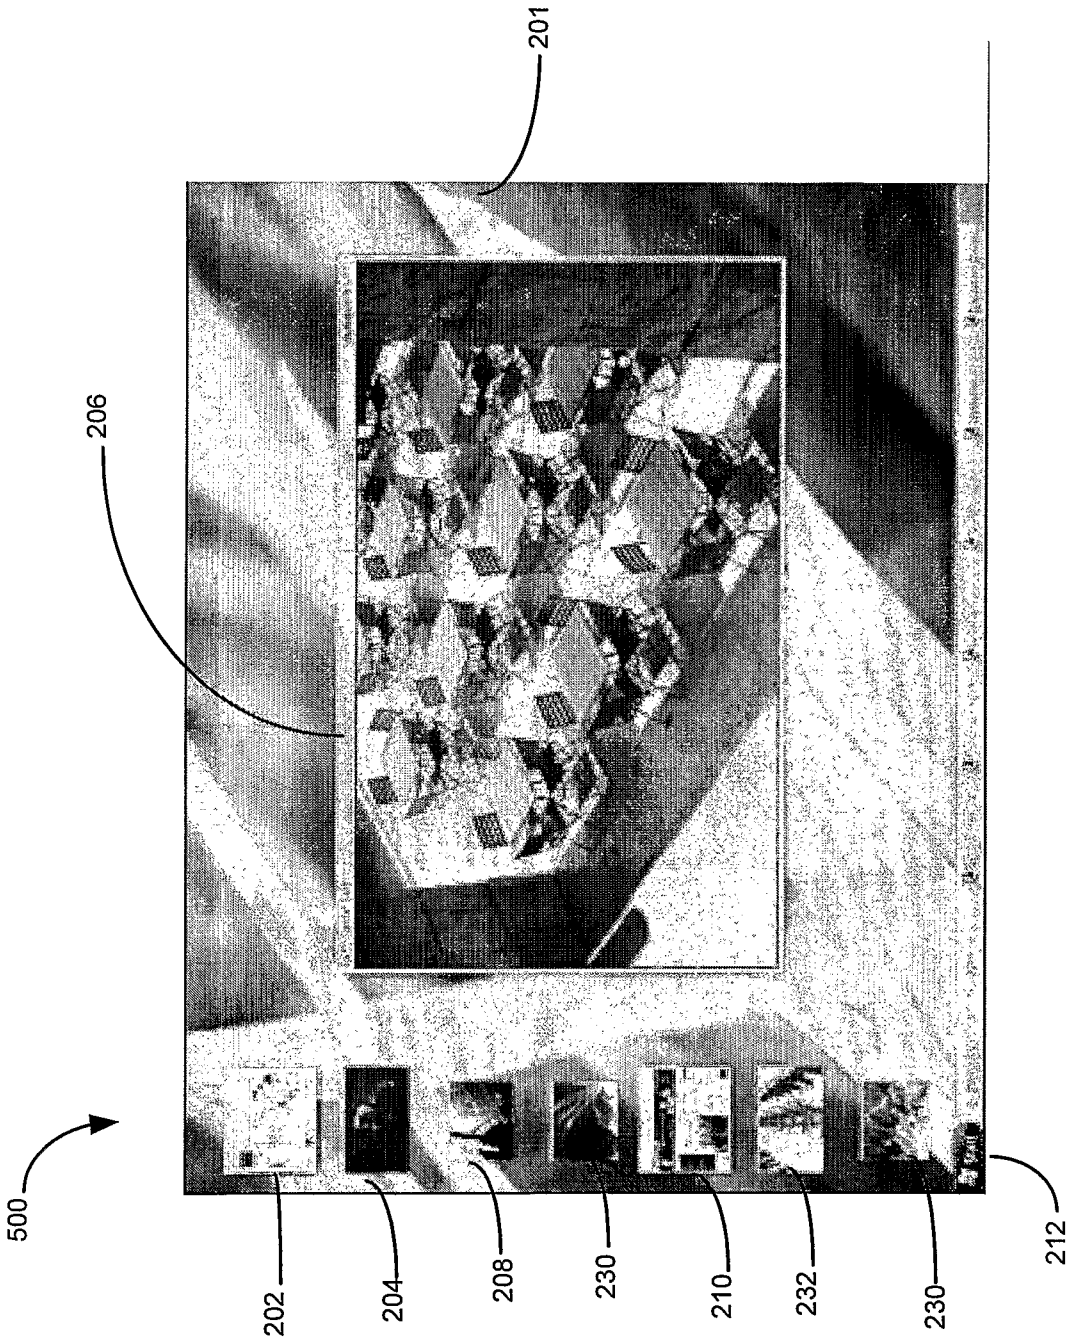

FIG. 5

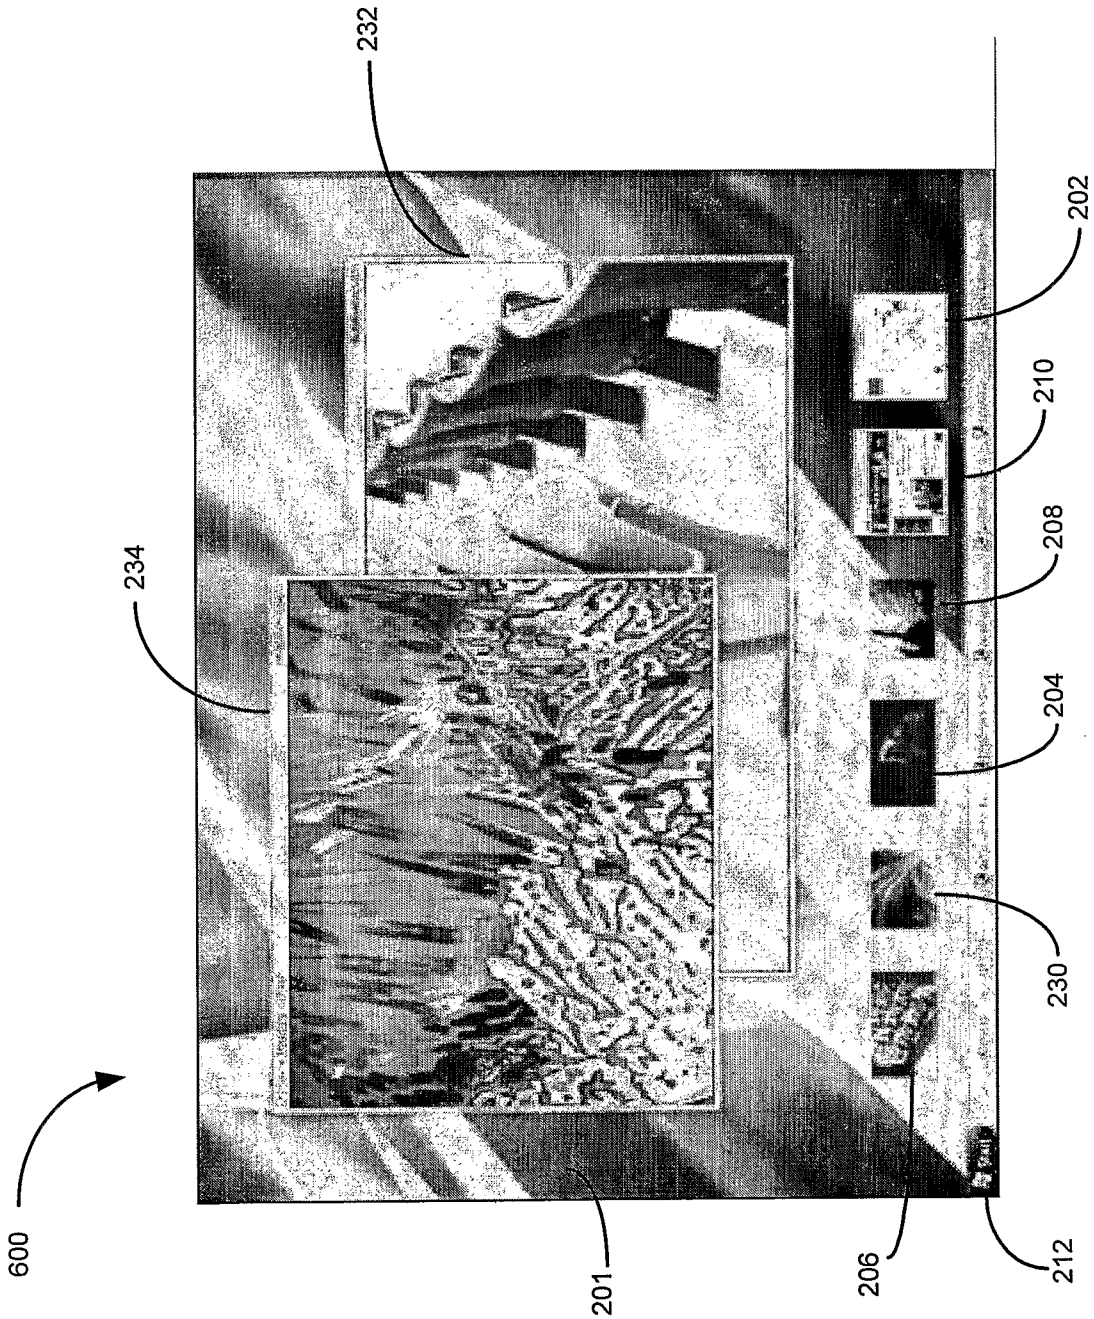

FIG. 6

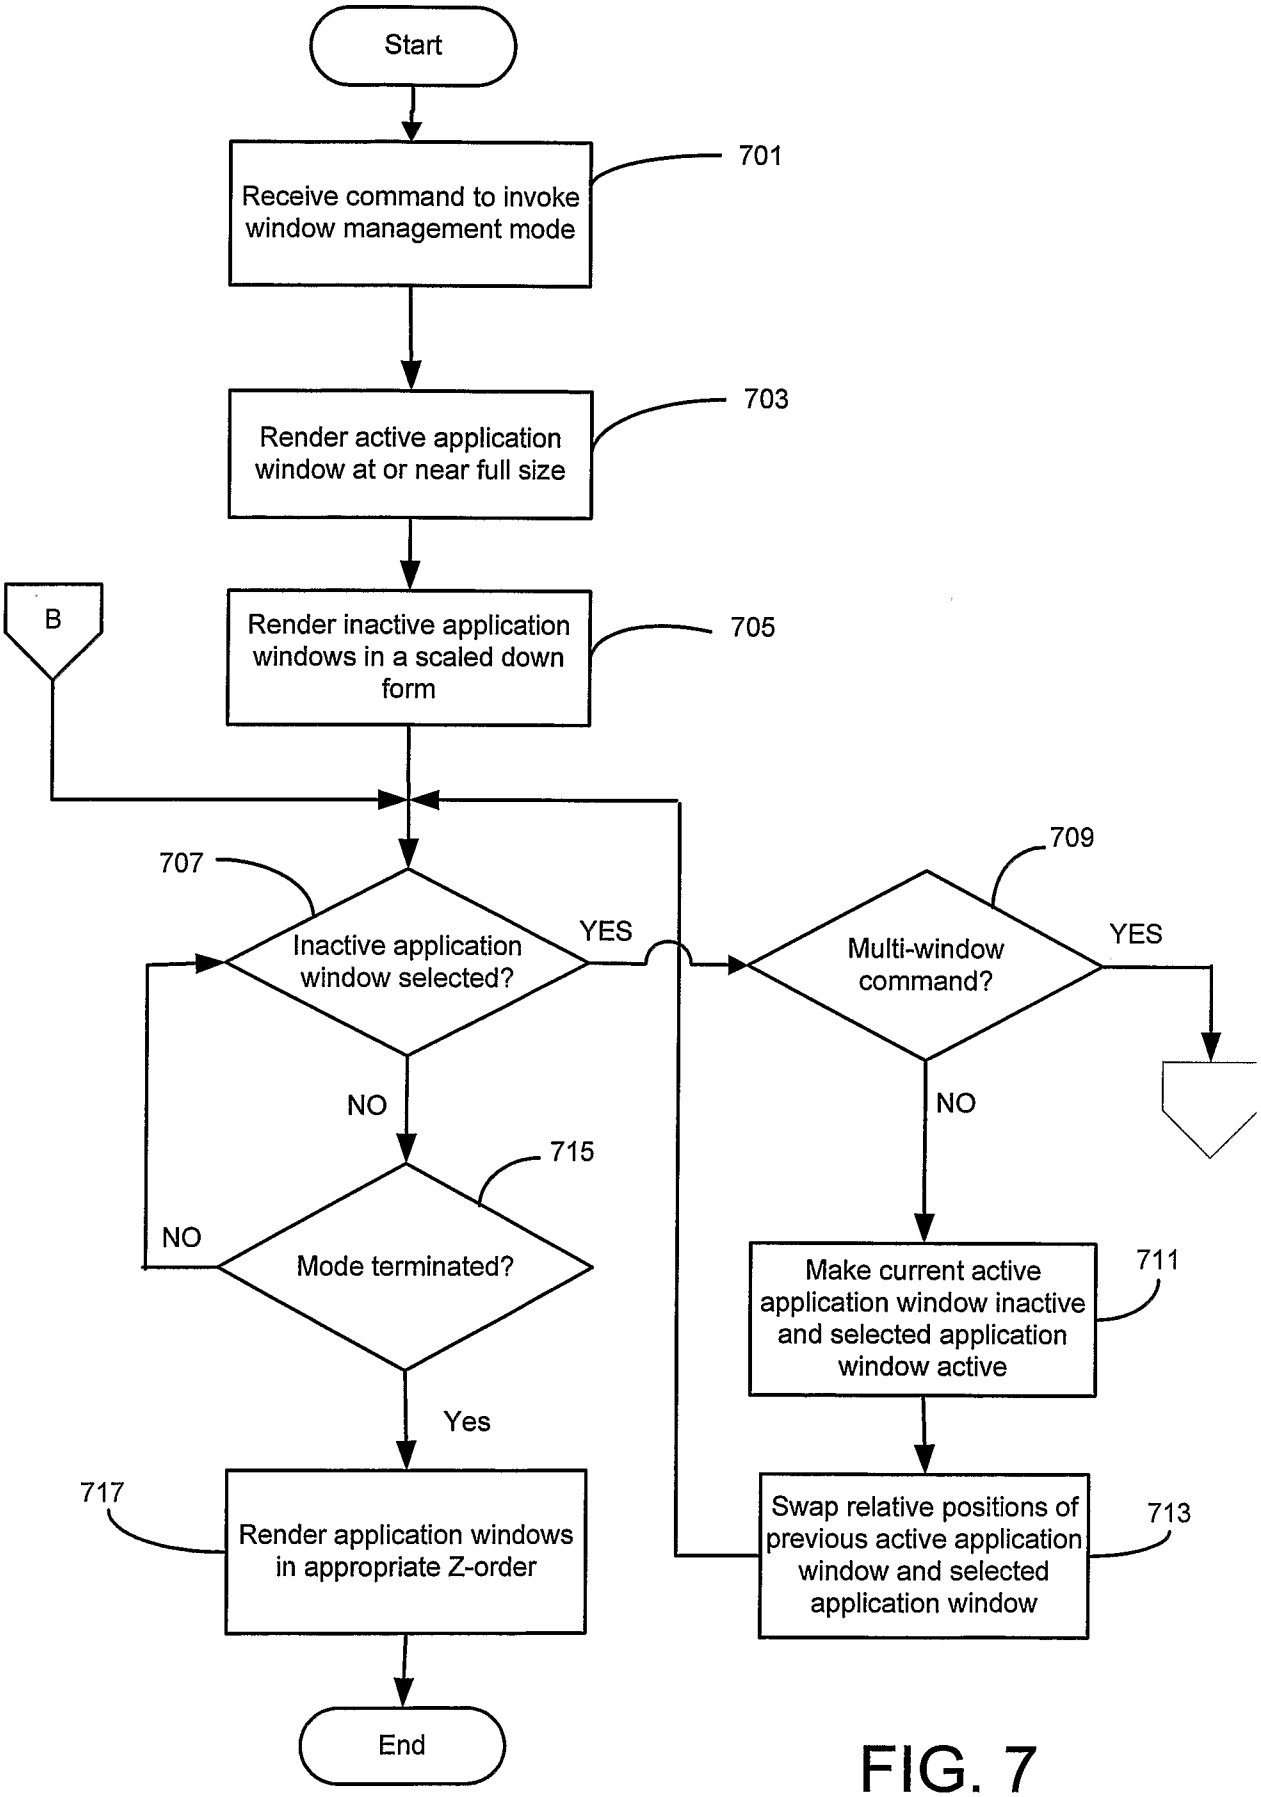

Start
Receive command to invoke window management mode
701
Render active application window at or near full size
703
Render inactive application windows in a scaled down form
705
B
707
Inactive application window selected?
YES
NO
709
Multi-window command?
YES
NO
715
Mode terminated?
NO
Yes
Make current active application window inactive and selected application window active
711
Swap relative positions of previous active application window and selected application window
713
717
Render application windows in appropriate Z-order
End

FIG. 7

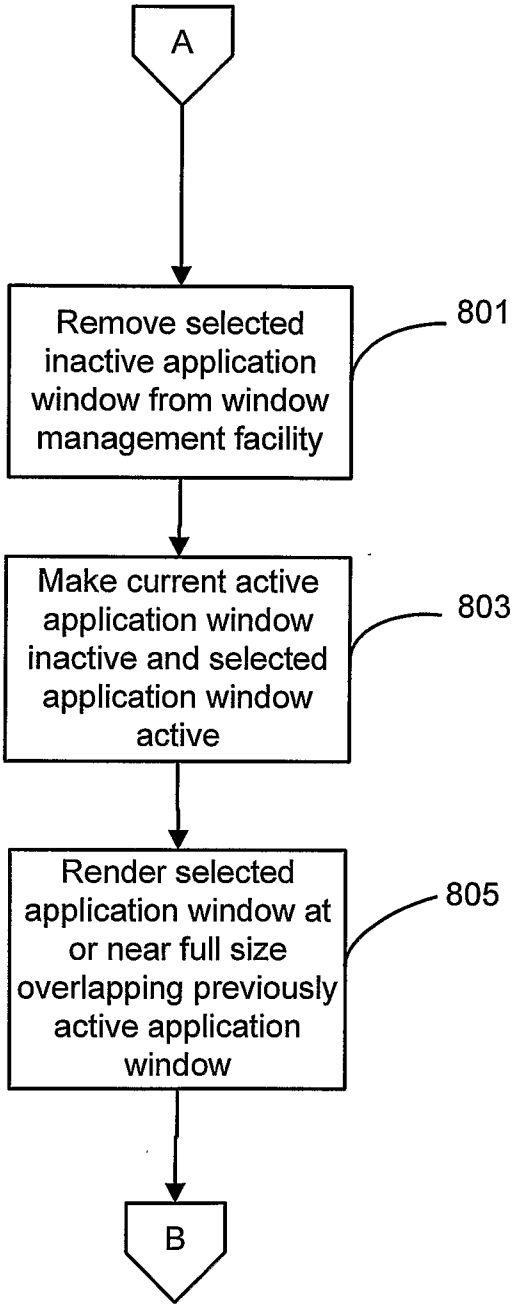

A
Remove selected inactive application window from window management facility
801
Make current active application window inactive and selected application window active
803
Render selected application window at or near full size overlapping previously active application window
805
B
