(54) Title: BIOPROCESS CHAMBER WITH FRUSTUM-SHAPED SECTION

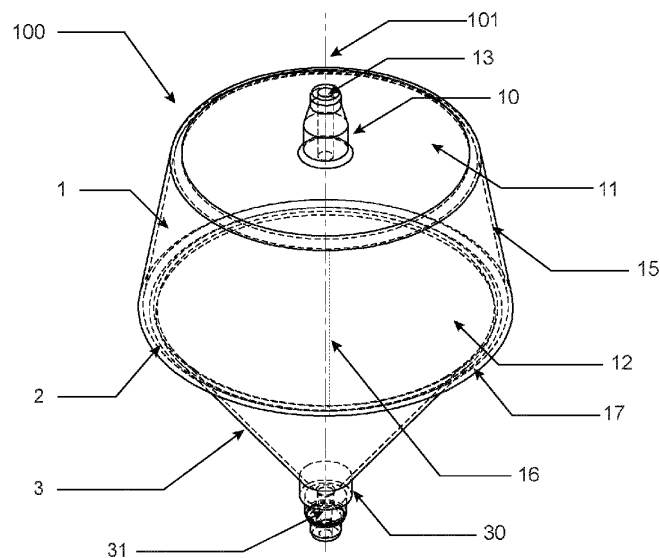

Fig. 1a

(57) Abstract: The invention refers to a processing chamber (100) shaped concentric around a center axis (101). The processing chamber (100) comprises a conical frustum shaped first body section (1) with a first base side (11) and a second base side (12). The second base side (12) opens into a second body section (2). The second body section extends along the center axis (101) with a first end of the second body section (2) pointing away from the first body section (1). The first end of the second body section (2) opens into a third body section (3). The third body section extends along the center axis (101) with a first end of the third body section (3) pointing in a direction away from the second body section (2) and wherein the first end of the third body section (3) is tapering into a second end (30) of the processing chamber (100).
