ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: DEVICES TO STABLISE THE LAMINA

(57) Abstract: A surgical implant device for stabil-
ising a lamina of the spine following a procedure in
which a cut is made in the lamina to form two lam-
ina portions. The device has a longitudinally extend-
ing spacer component 211 adapted to extend across
the cut between the lamina portions and adapted to
be fixed to the lamina. The device may have one or
more members 215 extending from one side of the
spacer component to fit in the space between the two
portions of the cut lamina when the device is fixed in
position. The device may comprise a first spacer part
and a second spacer part which are adapted to be po-
sitioned on opposite sides of the cut and connectable
together to fix the device in position.
