

ABSTRACT

The present technology relates to a receiving device,
a receiving method, a transmitting device, and a transmitting
method that can provide a common control system for executing
5 processes related to Non Real Time (NRT) contents.

An application obtaining portion obtains an application
program for executing a process related to NRT contents capable
of a download reservation and transmitted in non-real time,
and a function executing portion executes the process related
10 to the NRT contents on a basis of control information included
in the application program obtained by the application
obtaining portion. The present technology can be applied to
a television receiver that receives a digital television
broadcast signal, for example.
