(54) **Title:** SIMPLIFIED CONTROL OF COLOR SHIFTING PROPERTIES OF A CHIRAL LIQUID CRYSTAL POLYMER

(57) **Abstract:** The invention relates to a chiral liquid crystal precursor composition, wherein the chiral liquid crystal precursor composition comprises at least one salt that changes a position of a selective reflection band exhibited by the composition in a cured state compared to a position of a selective reflection band exhibited by a composition in a cured state that does not contain the at least one salt.
