

Abstract

The present invention belongs to the field of biomedicine and relates to an anti-EGFR monoclonal antibody, a bispecific antibody thereof, and a pharmaceutical composition and use thereof. Specifically, the present invention relates to an anti-EGFR antibody or an antigen-binding fragment thereof. The present invention further relates to an anti-EGFR-anti-Met bispecific antibody. The anti-EGFR monoclonal antibody and the bispecific antibody of the present invention have good anti-tumor activity.
