(54) Title: DISPOSABLE FLUID OR PARTICULATE APPLICATOR (57) Abstract The present invention is for a fluid or particulate dispenser that provides for the sterile dispensing of fluid or particulates. The dispenser includes a reservoir containing fluid or particulates and a spout or tool through which said fluid or particulates are dispensed. The dispenser includes a cover that protects the spout or tool from the outside and is tearable from the reservoir to uncover the spout or tool and enable the fluid or particulates to be dispensed through the spout and tool, which have been kept sterile. Particular uses include the one-off dispensing of foods or medical fluids/particulates, which are required to be hygienically dispensed.
