(54) Title: TERMITE AND WATERPROOF BARRIER

(57) Abstract: A waterproof and insect and termite resistant composition comprising inorganic additives and polyester fibres dispersed in a curable and settable acrylate latex, whereby the composition when covering a point of entry of termites to a building forms a termite barrier. The said composition impregnated into a construction fibre matting either formed *in situ* or preformed and sealed in place with the said composition across points of entry of termites to form a flexible, waterproof and insect and termite resistant barrier.
