(54) Title: INNER CAP FOR TONER CONTAINER AND TONER CONTAINER

FIG. 5

(57) Abstract: The present invention provides a toner container which can pass only air but a toner, has toner sealing ability, and does not allow toner leakage even during transportation and an inner pressure change of the container, by placing an air permeable member at the fitting part in the casing part. The present invention also provides an inner cap 30 which includes at least the air permeable member placed in the casing part of the inner cap, wherein the inner cap is used for a toner container that is detachably mounted to a developing unit in an image forming apparatus using an electrophotographical method, and the toner container is composed of at least a container main body 10, the inner cap 30, and an outer cap 20.
