(54) Title: SYSTEM AND METHOD FOR TREATING SHRIMP AND OTHER CRUSTACEANS

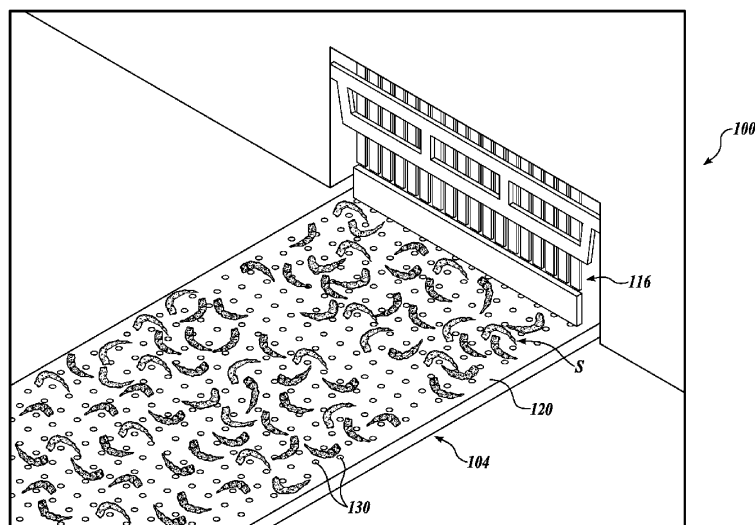

FIG. 1

(57) Abstract: In some aspects, the techniques described herein relate to an injection treatment solution for injecting a crustacean, including: water; and emulsified crustacean substrate of the crustacean being treated. In some aspects, the techniques described herein relate to a system for injection a crustacean, including: a conveyance system configured to substantially maintain a position of the crustacean relative to a support surface of the conveyance system before, during, and/or after injection; an injection treatment solution composed of water and emulsified crustacean substrate of the crustacean being treated; and an injector configured to inject the crustacean with the injection treatment solution as the crustacean is moved by the conveyance system. In some aspects, the techniques described herein relate to a method of injecting a crustacean, including: formulating an injection treatment solution including emulsified crustacean substrate of the crustacean being treated and water; and injecting a crustacean with the injection treatment solution.
