(54) Title: SELF-SEALING CHEMICAL INJECTION LINE COUPLING

(57) Abstract: There is provided a chemical injection line connector (24) including first and second couplings configured to automatically seal shut when the members are disengaged. There is further provided a method for blocking contamination or pressure transfer of chemical lines (26) by securing first and second couplings to corresponding ends of a chemical injection line and automatically sealing the couplings shut when the couplings are disengaged.
