

ABSTRACT

An orthodontic bracket that firmly fixes the auxiliary tool and facilitates its attachment and removal is provided. The orthodontic bracket 1 comprises a bracket body 3, slot portions 7 and 9 fixed to the bracket body 3 for passing a wire 5, and an auxiliary tool attachment portion 13 fixed to the bracket body 3 for attaching an auxiliary tool, wherein the auxiliary tool attachment portion 13 comprises a ring-shaped body portion 15 and an opening and closing portion 17 for opening and closing the body portion 15.
