(54) Title: ELECTRICAL STIMULATION SYNCHRONIZED WITH PATIENT BREATHING

FIG. 1

(57) Abstract: A method of providing electrical stimulation to a patient, to treat a disorder from which the patient suffers, includes: detecting respiration of the patient with a sensor; and repeatedly administering electrical stimulations to a target site of the patient. Suitably, the repeated administration of said electrical stimulations is automatically synchronized with the respiration of the patient as detected by the sensor.
