claims and to be republished in the event of receipt of
amendments (Rule 48.2(h))

(54) Title: A PEST CONTROL DEVICE FOR RECOGNIZING PEST, A PEST CONTROL SYSTEM AND A METHOD FOR
RECOGNIZING PEST BY RUNNING THE PEST CONTROL SYSTEM

Figure 1

(57) Abstract: The disclosure relates to a pest control device (10) for recognizing pest (11), comprising: a housing (12); a processor (14); a memory (16); a data communication device (18) configured to communicate with a gateway (20) or another pest control device (10); a sound recording device (24) configured to record one or more sound patterns; wherein the processor (14) is configured to perform a recognition process identifying a pest species or a subgroup thereof based on the recorded one or more sound patterns by a comparison with a selection of sound patterns in the memory (16) or in a remote memory (17), wherein each sound pattern corresponds to the pest species or the subgroup thereof. The disclosure further relates to a pest control system (36) and a method for recognizing pest by running the pest control system.
