

ABSTRACT OF THE DISCLOSURE (FIG. 1)

5 "STAMPER FOR MAGNETIC RECORDING MEDIA, METHOD
OF MANUFACTURING MAGNETIC RECORDING MEDIA
USING THE SAME, AND METHOD OF MANUFACTURING
STAMPER FOR MAGNETIC RECORDING MEDIA"

According to one embodiment, a stamper for a
magnetic recording media has patterns of protrusions
10 and recesses to manufacture a discrete track recording
type magnetic recording media having servo areas
including an address portion, a preamble portion and a
burst portion, and data areas including a recording
track portion, the patterns of protrusions and
15 recesses being formed at a pitch of 400 nm or less, in
which a magnitude relation of depths of recesses
corresponding to the address portion, the preamble
portion, the burst portion and the recording track
portion is inverted to a magnitude relation of area
20 ratios of the protrusions to the recesses in the
address portion, the preamble portion, the burst
portion and the recording track portion.
