

ABSTRACT

There is provided a massage machine that, as a single unit, massages the leg, such as the foot and the calf, of a user, and can also massage at least the upper body of the user.

The massage machine(1) comprises: a first massaging element (6) that massages a first to-be-massaged part (L) of a user; and a second massaging element (29, 35, 37) that massages a second to-be-massaged part (A, W, B) of the user. The first massaging element (6) is located on one side of a partition plate (21, 22) mounted so as to extend in a right-left direction, and the second massaging element (29, 35, 37) is located on the other side of the partition plate (21, 22).
