ABSTRACT

Provided is a method, apparatus, system and electronic device for credit tax refundment. The method for credit tax refundment comprises receiving a request for credit tax refundment and a refund amount (201); parsing the request for credit tax refundment to obtain identity information of a user applying for refundment (202); determining whether or not a user corresponding to the request is eligible for credit tax refundment based on the identity information of the user (203); obtaining an associated account based on the identity information of the user and remitting a tax refund of an equivalent amount into the associated account, in the case that the user corresponding to the request is eligible for credit tax refundment (204).
