

ABSTRACT

Provided in one or more embodiments of the present description are a content sharing method and apparatus. The method may comprise: a server receiving a content sharing request initiated by a sharing party user, wherein the content sharing request is used for sharing content to be shared, submitted by the sharing party user, in a specific organization where the sharing party user is located; and the server releasing the content to be shared to the specific organization, so that the content to be shared is presented on a content sharing interface related to the specific organization.
