(57) Abstract: Various systems and methods that may relate to referral and/or delivery services are described. Some embodiments may include receiving from a user on a remote device an order for delivery of a plurality of items. Each item comprises an unique identifier. Embodiments also may include determining a location of the user; identifying at least two providers located within a radius of the user, in which each provider is capable of delivering the requested items; computing for each provider a total cost of delivery of the requested items; receive a request for a first provider to deliver the requested item; and facilitate delivery of the items.
