

Abstract

**Cocking device for a firing pin and weapon comprising
said cocking device**

Disclosed is a cocking device for a firing pin spring (13.2) of a firing pin (13) of a weapon (100), the firing pin (13) being integrated into a breech (1). This firing pin spring (13.2) is cocked during the pre-run of the control slide (2), by means of a cocking slide (17) on the weapon (100), said cocking slide having a cocking curve (17.1), in which a pin (14.1) of a cocking rocker (14) is engaged.
