

**REPRODUCING APPARATUS, RECORDING APPARATUS, AND  
RECORDING MEDIUM**

**ABSTRACT OF THE DISCLOSURE**

In reproducing a recording medium having a main data area for recording main data, an auxiliary data area for recording auxiliary data such as image data and text data corresponding to the main data, a first control area for controlling the main data area, and a second control area for controlling the auxiliary data, the auxiliary data is reproduced in a predetermined timed relation with the main data based on synchronization information recorded in the second control area.
