WHAT IS CLAIMED IS:

1. An eyelid cleanser composition comprising:

(a) a hypochlorous acid;

(b) one or more surfactants having a HLB value of 5 to 18; and

(c) an aqueous vehicle, the aqueous vehicle comprising:

(i) one or more tonicity adjusters;

(ii) one or more osmolality adjusters for adjusting an osmolality of the composition, wherein the osmolality of the composition is from 100 mOsm/kg to 500 mOsm/kg; and

(iii) one or more pH modifiers for adjusting a pH of the composition to between 4.5 to 7.0,

wherein the composition comprises from 50 to 300 ppm hypochlorous acid.

2. The eyelid cleanser composition according to Claim 1, wherein the one or more surfactants has a HLB value from 10-18.

3. The eyelid cleanser composition according to Claim 1, wherein the composition includes a combination of surfactants, wherein a first surfactant has a HLB value from 10 to 18 and a second surfactant has a HLB value from 5-10.

4. The eyelid cleanser composition according to Claim 1, wherein the one or more surfactants are selected from the group consisting of nonionic and amphoteric surfactants.

5. The eyelid cleanser composition according to Claim 4, wherein the one or more surfactants is selected from the group consisting of sorbitan, sorbitan monolaurate, polyoxyethylene or polyethylene glycol (PEG) modified molecules such as PEG-modified surfactants, PEG-modified phospholipids, PEG-modified sugars, amineoxides, block copolymers and mixtures thereof.

6. The eyelid cleanser composition according to Claim 1, wherein a total concentration of the one or more surfactants in the composition is in the range of 0.01 to 20% w/w.

oo

7. The eyelid cleanser composition according to Claim 6, wherein a total concentration of the one or more surfactants in the composition is in the range of 0.01 – 5% w/w.

8. The eyelid cleanser composition according to Claim 1, wherein the tonicity adjuster is selected from the group consisting of sodium chloride, potassium chloride, calcium chloride, magnesium chloride, sodium lactate, potassium lactate, calcium lactate and mixtures thereof.

9. The eyelid cleanser composition according to Claim 1, wherein the one or more osmolality adjusters is selected from the group consisting of sugars, glycerin, propylene glycol and mixtures thereof.

10. The eyelid cleanser composition according to Claim 1, wherein the composition is in a foam, liquid, spray, mist, gel or lotion form.

11. The eyelid cleanser composition according to Claim 1, further comprising a foam stabilizer.

12. The eyelid cleanser composition according to Claim 11, wherein the foam stabilizer is a polyethylene glycol diester of methyl glucose and a fatty acid.

13. The eyelid cleanser composition according to Claim 1, further comprising 0.01 – 5% w/w of one or more ingredients selected from the group consisting of propylene glycol, glycerin, liquid polyols, nut oils and derivatives, floral extracts, fruit extracts, sodium alginate, hyaluronic acid, diglycerides, triglycerides, PEG-75 Lanolin, mineral oil, silicone oil and mixtures thereof.

14. The eyelid cleanser composition according to Claim 1, further comprising 0.01 – 5% w/w of one or more ingredients selected from the group consisting of an antioxidant, an anti-irritant, a cooling agent, a viscosity modifier and mixtures thereof.

oo

15. A kit for maintaining eyelid hygiene, wherein the kit consists essentially of an applicator and the eyelid cleanser composition according to Claim 1.

16. The kit according to Claim 15, wherein the applicator comprises a hypoallergenic, non-woven, hydrophilic material.

17. A kit for maintaining eyelid hygiene, wherein the kit consists essentially of an applicator pre-moistened with a clinically effective amount of the eyelid cleanser composition according to Claim 1.

18. The kit for maintaining eyelid hygiene according to Claim 17, wherein the applicator comprises one or more fabric pads, wherein each pad is individually packaged in a sealable package.
