

(12) INTERNATIONAL APPLICATION PUBLISHED UNDER THE PATENT COOPERATION TREATY (PCT)

(19) World Intellectual Property
Organization
International Bureau

(43) International Publication Date
24 September 2020 (24.09.2020)

(10) International Publication Number
WO 2020/186332 A1

(51) International Patent Classification:

H04B 1/28 (2006.01) H04L 7/00 (2006.01)
H04B 17/336 (2015.01) H04W 56/00 (2009.01)

(21) International Application Number:

PCT/CA2020/000029

(22) International Filing Date:

18 March 2020 (18.03.2020)

(25) Filing Language:

English

(26) Publication Language:

English

(30) Priority Data:

62/819,834 18 March 2019 (18.03.2019) US

(72) Inventors; and

(71) Applicants: **NABKI, Frederic** [CA/CA]; c/o Spark Microsystems Inc., C-2150, 400 rue Montfort, Montreal, Quebec H3C 4J9 (CA). **DESLANDES, Dominic** [CA/CA]; c/o Spark Microsystems Inc., C-2150, 400 rue Mont-

fort, Montreal, Quebec H3C 4J9 (CA). **SOER, Michiel** [CA/CA]; c/o Spark Microsystems Inc., C-2150, 400 rue Montfort, Montreal, Quebec H3C 4J9 (CA). **MORIN-LAPORTE, Garbriel** [CA/CA]; c/o Spark Microsystems Inc., C-2150, 400 rue Montfort, Montreal, Quebec H3C 4J9 (CA). **TAHERZADEH-SANI, Mohammad** [CA/CA]; c/o Spark Microsystems Inc., C-2150, 400 rue Montfort, Montreal, Quebec H3C 4J9 (CA).

(74) Agent: **PERLEY-ROBERTSON, HILL & MCDOUGALL LLP/SRL**; 1400 - 340 Albert Street, Ottawa, Ontario K1R 0A5 (CA).

(81) Designated States (unless otherwise indicated, for every kind of national protection available): AE, AG, AL, AM, AO, AT, AU, AZ, BA, BB, BG, BH, BN, BR, BW, BY, BZ, CA, CH, CL, CN, CO, CR, CU, CZ, DE, DJ, DK, DM, DO, DZ, EC, EE, EG, ES, FI, GB, GD, GE, GH, GM, GT, HN, HR, HU, ID, IL, IN, IR, IS, JO, JP, KE, KG, KH, KN, KP, KR, KW, KZ, LA, LC, LK, LR, LS, LU, LY, MA, MD, ME,

(54) Title: METHODS AND SYSTEMS FOR ULTRA WIDEBAND (UWB) RECEIVERS

Figure 7A

(57) Abstract: Ultra-Wideband (UWB) wireless technology transmits digital data as modulated coded impulses over a very wide frequency spectrum with very low power over a short distance. Accordingly, the inventors have established UWB devices which accommodate and adapt to inaccuracies, errors, or issues within the implemented electronics, hardware, firmware, and software. Beneficially, UWB receivers may accommodate offsets in absolute frequency between their frequency source and the transmitter, accommodate drift arising from phase locked loop and/or from relative clock frequency offsets of the remote transmitter and local receiver. UWB devices may also employ modulation coding schemes offering increased efficiency with respect to power, data bits per pulse transmitted, and enabled operation at higher output power whilst complying with regulatory emission requirements. Further, UWB devices may support a ranging function with range / accuracy not limited to the low frequency master clock employed within these devices enabling operation with ultra-low power consumption.
