(54) Title: A DRUG ELUTING MEMBER, A METHOD OF ATTACHING THE SAME AND A METHOD OF FABRICATING THE SAME, A DEVICE FOR HOLDING THE SAME AND A DRUG ELUTING DEVICE

Fig. 1

(57) Abstract: The present invention provides the following: a drug eluting member adapted to be attachable onto a perimeter edge of a lens portion of an intraocular lens, the drug eluting member includes an interfacing portion adapted to receive a portion of the perimeter edge; a drug eluting device that includes a first drug eluting member and a second drug eluting member, the first drug eluting member is adapted to be attached to the portion of the perimeter edge, and the second drug eluting member is adapted to be attached to another portion of the perimeter edge; a method of attaching a drug eluting member to a perimeter edge of the lens portion using the device, the method includes positioning the device with the drug eluting member held therein against a portion of the perimeter edge; and releasing the drug eluting member from the device to attach the drug eluting member to the lens portion; a method of fabricating the drug eluting member which includes providing a mold for molding the drug eluting member; discharging a forming solution from a nozzle onto the mold; and forming the drug eluting member.
