

ABSTRACT

The present disclosure relates to a method and device for reporting a beam failure of a Secondary Cell (SCell) and a storage medium. The method includes that: User Equipment (UE) determines that a first SCell has a beam failure; a target serving cell for transmitting a report message to a base station is determined, the report message being configured to notify the base station of that the first SCell has the beam failure; and the report message is transmitted in the target serving cell. According to the embodiments of the present disclosure, the beam failure of the SCell of the UE is reported.
