(54) Title: SPIN ON POLYMERS FOR ORGANIC MEMORY DEVICES

(57) Abstract: A method of making organic memory cells (104) made of two electrodes (106, 108) with a controllably conductive media (110) between the two electrodes (106, 108) is disclosed. The controllably conductive media (110) contains an organic semiconductor layer (112) and passive layer (114). The organic semiconductor layer (112) is formed using spin-on techniques with the assistance of certain solvents.
