(54) Title: IMPROVED ANTI-oxMIF ANTIBODIES WITH REDUCED AGGREGATION POTENTIAL AND REDUCED HYDROPHOBICITY

(57) Abstract: The invention refers to anti-oxMIF antibodies with improved properties such as reduced aggregation potential and reduced hydrophobicity due to selected amino acid substitutions in the light and heavy chain variable domains and optionally increased effector functions due to further substitutions in the heavy chain constant regions, and their use in the treatment of oxMIF-related conditions.
