(54) Title: MONO-LYSINE SALTS OF AZOLE COMPOUNDS

(57) Abstract: Mono-lysine salts of triazole compounds having a secondary or tertiary hydroxy group are provided. More particularly, the new water-soluble triazole antifungal mono-lysine salt compounds, or solvates thereof, are provided having the general formula I: wherein A in formula I represents the non-hydroxy portion of a triazole antifungal compound of the type containing a secondary or tertiary hydroxyl group. R and R1 in formula I can each be a hydrogen atom or an alkyl group having one to six carbon atoms. The novel water-soluble azole compounds are useful for the treatment of fungal infections and can be administered orally, topically and parenterally.
