(54) Title: CAP FOR MINERAL WATER SPRAYING BOTTLE AND MULTIFUNCTIONAL MINERAL WATER SPRAYING BOTTLE WITH THE SAME

(54) 发明名称: 一种喷雾矿泉水瓶盖及其构成的多功能喷雾矿泉水瓶

图 1 / FIG. 1

(57) Abstract: A cap for a mineral water spraying bottle includes a cap body (1), a spraying device (2) and a water locking device. A multifunctional mineral water spraying bottle is formed by cooperation between said bottle cap and an elastically deformable mineral water bottle, ensuring the normal drinking of the mineral water and realizing the drinking of sprayed water. Being manually pressed, the bottle body is deformed, giving cause for increasing of the pressure in the bottle body. Water enters into the water inlet through the water outlet of the water locking device in the bottle cap, enters into the atomizing groove through the guiding grooves and is sprayed from the spraying hole. In a rather dusty and hot outdoor environment, with the mineral water bottle being inverted, the spraying head facing to human bodies or air around human bodies and the bottle body being pressed, spraying mist to the air can be realized, so as to reduce temperature around the human body and to remove dust, thus enabling a user to feel cool, fresh and comfortable.
