(54) Title: CABLE TESTING SYSTEMS

(57) Abstract: A cable testing system including a network tester (10) connected to a multi-line test coupler (11), which includes a plurality of output cables (12) connected to a patch panel (15). A terminator (16) is also connected to the patch panel (15) to selectively test line (12) by engaging wall outlets etc., with the terminator (16). With this system it is not necessary to connect the tester to each individual line thereby saving considerable time and expense.
