(54) Title: PRINTER HEAD AND PRINTER DISK CLEANING COMPOSITIONS AND METHODS OF USE

FIG. 1B

(57) Abstract: The present invention relates to compositions and methods for cleaning by contacting a hard disk data storage device, an inkjet printer cartridge head, or the like having residue thereon, particularly organometallic or metal oxide residue, with a cleaning composition of present invention for a time and at a temperature sufficient to remove the residue. Stirring, agitation, circulation, sonication or other techniques as are known in the art optionally may be used. The hard disk data storage device, an inkjet printer cartridge head, or the like is generally immersed in the cleaning composition. The time and temperature can be determined based on the particular material being removed from a substrate. The hard disk data storage device, inkjet printer cartridge head, et al may be rinsed after using the composition or not, as such rinse is unnecessary with Al₂O₃; rinse solutions include isopropanol and/or deionized water.
