(54) Title: HANDLING OF TRANSMISSION OR RECEPTION DURING MEASUREMENT GAP

Fig. 11

(57) Abstract: Various aspects of the present disclosure relate to handling of transmission or reception during an MG. In one aspect, a UE receives at least one MG configuration for one or more MGs from a base station. In turn, the UE performs uplink transmission or downlink reception on at least one resource which is overlapped with at least one MG among the one or more MGs. With this solution, dynamic control of uplink transmission and downlink reception during an MG may be achieved.
