(54) Title: HUMANIZED ANTIBODY

(57) Abstract: The present invention provides novel methods and compositions comprising highly specific and highly effective antibodies that specifically recognize and bind to specific epitopes from a range of β-amyloid proteins. The antibodies of the present invention are particularly useful for the treatment of ocular diseases associated with pathological abnormalities/changes in the tissues of the visual system, particularly associated with amyloid-beta-related pathological abnormalities/changes in the tissues of the visual system.
