(54) Title: A MIXED METAL CATALYST COMPOSITION, ITS PREPARATION AND USE

(57) Abstract

The invention pertains to a process for preparing a catalyst composition comprising bulk catalyst particles comprising at least one Group VIII non–noble metal and at least two Group VIB metals, which process comprises combining and reacting at least one Group VIII non–noble metal component with at least two Group VIB metal components in the presence of a protic liquid, with at least one of the metal components remaining at least partly in the solid state during the entire process. The invention further relates to a catalyst composition obtainable by said process and to the use thereof in hydroprocessing applications.
