(54) Title: INK-JET RECORDING METHOD AND RECORDING MEDIUM USED THEREIN

(57) Abstract: An ink-jet recording method for performing recording on a recording medium by attaching ink thereto with the recording medium adhering to a conveyor belt because of electrostatic attraction thereto is disclosed. In this method, the electrostatic attraction is caused by a charging unit that applies AC bias to the conveyor belt so that positive and negative charges are provided on the conveyor belt so as to alternate with each other in a direction in which the conveyor belt moves. The surface of the recording medium which surface comes into contact with the conveyor belt has surface resistivity that falls within a range of 1 to 9 .
