(54) **Title:** FEC BASED DISCARD

Fig. 14

(57) **Abstract:** Various aspects of the present disclosure relate to DL FEC based discard. In one aspect, a first network node obtains FEC information from a core network. Then, the first network node determines, based on the FEC information, first information about PDUs to be discarded by the first network node and a second network node. Then, the first network node determines, based on the first information, second information about at least one first PDU to be discarded by the first network node and third information about at least one second PDU to be discarded by the second network node. Then, the first network node transmits the third information to the second network node. In turn, the first network node discards the at least one first PDU based on the second information.
