

ELEVATOR APPARATUS OF SEISMIC ISOLATION BUILDING AND NON-SEISMIC
ISOLATION BUILDING

ABSTRACT OF THE DISCLOSURE

G00002

In order to make a space for an entrance part large, an entrance of the wall for partitioning off a clearance for an earthquake motion from a building is got rid of, and an expansion floor is installed by approaching movable wall which spread to a partition wall provided in the right and left side to hoisting road side. The expansion floor can be moved to front and back directions by using the partition wall in right and left sides as a guide, and follows the hoisting road. Furthermore, it moves with the hoisting road side to the right and left directions independently, and follows the non-seismic isolation building.
