CATHODE RAY TUBE APPARATUS

ABSTRACT OF THE DISCLOSURE

A CRT explosion-protection band comprising a band body to be wound around the circumference of a panel portion of the CRT and CRT holders for affixing the CRT to a mounting. Projections for attaching the CRT holders to the band body by projection welding are formed at the band body side. In accordance with this configuration, the occurrence of scratches etc. is prevented even when mounted to the panel portion of the CRT and the explosion-protection performance is improved.
