

## ABSTRACT

USE OF A COATING COMPRISING AN ACID-FUNCTIONAL POLYMER AND  
AN ORGANOSILANE

Use of a coating comprising an acid-functional polymer formed from 0.1% to 20% by weight, based on the total weight of said polymer, of at least one acid-functional monomer and from 0.1% to 20% by weight, based on the weight of said acid-functional polymer, of at least one organosilane having a number average molecular weight of from 100 to 10,000 as at least one of the following: a tannin stain block, a scrub resistant, a water whitening resistant, a hot block resistant, a fire and smoke block, a nicotine stain block, a pen and ink stain block, a water stain block and an adhesive improver.
