

BEVERAGE CONTAINING GALACTO-OLIGOSACCHARIDE

ABSTRACT

An object of the present invention is to improve an unpleasant finish caused by vanillin in a beverage comprising vanillin and having a degree of sweetness of not more than 9.

A galactooligosaccharide is added to a beverage comprising not less than 5 ppb of vanillin and having a degree of sweetness of not more than 9, to adjust the galactooligosaccharide content in the beverage to not less than 1500 ppm.
