(54) Title: CHILD CAR SEAT AND SEAT BACK ASSEMBLY THEREOF

100

FIG. 1

(57) Abstract: The present disclosure discloses a seat back assembly including a backrest, a headrest and a side wing. The headrest is slidably installed an upper end of the backrest, and the side wing is disposed on a side of the backrest and is capable of folding and unfolding relative to the backrest. The seat back assembly further includes a driving member, which is disposed on the backrest or the headrest and moves along with the headrest relative to the backrest. The headrest at least, relative to the backrest, an initial position close to the backrest and an operation position driving the side wing to unfold relative to the backrest. The side wing is folded on the backrest when the headrest slides to a position between the initial position and the operation position. The driving member drives the side wing to unfold relative to the backrest when the headrest slides in a direction away from the backrest and passes beyond the operation position. The seat back assembly of the present disclosure features an advantages of having a simple structure. The present disclosure further discloses a child car seat.
