

ABSTRACT

CLEANING TOOL AND STICK-LIKE TOOL

In a cleaning tool 1, a lock piece 50 provided to the other of a handle 10
5 and a main body 20 can be switched between a lock position and a lock release
position, the lock piece 50 positioned in the lock position butts against a
stopper face 41D of an engagement member 41 to retain the engagement
member 41 in a position of engagement with the recessed face 36, and the lock
piece 50 positioned in the lock release position separates from the stopper face
10 41D of the engagement member 41 to allow the engagement member 41 to
resiliently move forward and backward.
